O   Polystyrene packer

P   Soft Close kit (optional)

Q   Optional Architrave kit (not shown)

Sliding Pocket Door for Plasterboard Stud Walls

Pocket Slide 80 is a simple and efficient patented system for installing a pocket sliding door within a metal or timber stud wall. The kit is easily adaptable on site to suit a large range of door widths and heights and is available for single or double doors.

An optional Architrave Kit is available which fits neatly to the existing pocket door frame profile. It features seals to help reduce draught, light and noise pollution between rooms.

Maximum panel weight - 80kg
Maximum panel width - 926mm (leaf width)
Maximum panel height - 2040mm (leaf height)

HIGH QUALITY MULTILAYER WOODEN BEAM

- Absorbs vibrations for quiet operation
- Avoids hairline cracks in plaster finish
- Anodized black finish provides a neat integration into the wall structure
- Facilitates the installation of the framing profiles with a strong and effective anchoring system

SLIDING SYSTEM

- U-shaped aluminium track for high stability
- Roller body in Zamak and Delrin wheels with ground and shielded bearings for durability and smooth slide action
- Precise and long-lasting slide - tested in accordance with EN 1527
- Built-in adjustable stopper
- Optional soft close kit
- Optional architrave kit

CERTIFICATED QUALITY

- Galvanised vertical profiles with 200gr/m^2 total anti-corrosive protection
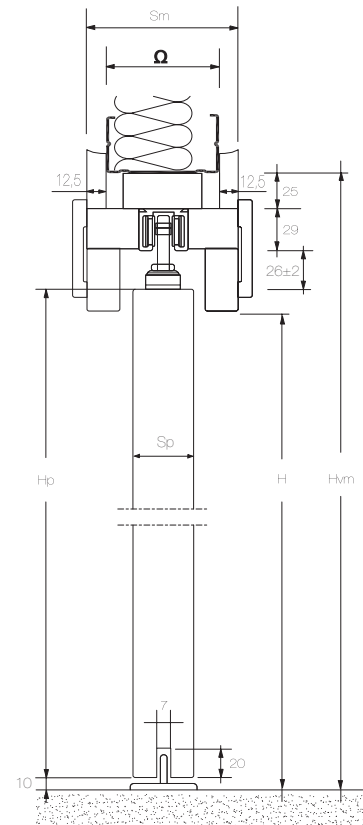

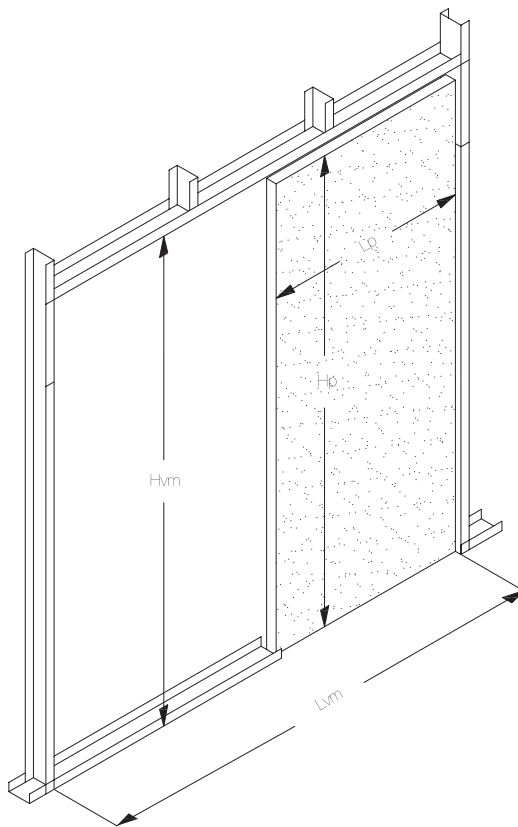

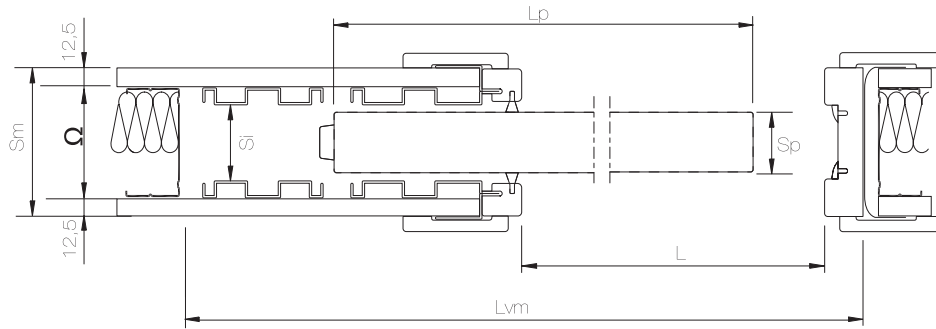

RAPID INSTALLATION OF FRONT PROFILE

- The shape of the front profile facilitates a rapid installation of the gypsum board panels
- Produces a stiff and stable wall structure

INSTALLATION

- **Pocket Slide 80** is the only Universal fitting kit
- Covers all door widths from 626 to 926mm
- Installs directly into the stud wall structure
- Can be installed by one person
